

# Unleashing Ollscoil na Gaillimhe / University of Galway's Research Data Into the Future

Jorrit Poelen <https://jhpoelen.nl>

2025-03-03

# Guiding Questions

- ▶ How do you cite *your* research data?
- ▶ How do you lookup cited data *now*?
- ▶ How do you lookup cited research data *40 years from now*?

## Research Data In the Wild

*While walking the land, I am the pen on the paper; while drawing this map, my pen is myself walking the land. I wanted to short circuit the polarities of objectivity and subjectivity, and try keep faith with reality. – Tim Robinson*

# There's a Map on the Internet. . .

Tim Robinson's townland index for Connemara and the Aran Islands, Map of the Aran Islands, Oileán Árann, Folding Landscapes, 1980. Published by NUI Galway's Digital Collections.

*I came to it from a fine arts background and used it as an art form. I wasn't remotely interested in what the standard way of representing limestone was, for example. I was much more interested in using some sort of graphic texture on a map that would represent my own experience of the place.*  
– Robinson

# Trying Zenodo . . .

The screenshot shows the Zenodo search interface. At the top, the Zenodo logo is on the left, and a search bar contains the text 'Tim Robinson's townland inde'. To the right of the search bar are links for 'Communities' and 'My dashboard', and a user profile dropdown for 'jhpoeien...'. Below the search bar, the results show '3,773,486 result(s) found'. On the left side, there are filters for 'Versions' (with a 'View all versions' toggle), 'Access status' (with checkboxes for 'Open', 'Restricted', and 'Embargoed'), and 'Resource types' (with a dropdown for 'Publication'). The main content area displays two search results. The first result is 'Aran Map (Original) P120/3/1/1 hash://md5/c6329b14a9542c216010646dfe7d56d5' by Robinson, Tim, dated December 31, 1980 (v1). It has 3,628,736 downloads and is marked as 'Open'. The second result is 'Aran Map (Web Version) hash://md5/9401abef940bbb961b8b05ba76aa247d' by Robinson, Tim, also dated December 31, 1980 (v1). It has 3,981 downloads and is marked as 'Open'. Both results include a description of the map and its scale, and an upload date of March 3, 2025.

# How To Retrieve Robinson's Map Today?

- ▶ turn on the internet
- ▶ open a web browser
- ▶ search the internet for keywords
  - ▶ and rely on a delicate and complex socio-technical network
- ▶ inspect result pages
- ▶ use mouse to click on a link that looks like Robinson's map
- ▶ download image and **trust** its authenticity

# How To Retrieve Robinson's Map 40 Years From Now?

- ▶ turn on the internet (***Still there?***)
- ▶ open a web browser (***Grandma, what is a browser?***)
- ▶ search the internet for keywords (***Internet search? Huh?***)
  - ▶ and rely on a delicate and complex socio-technical network
- ▶ inspect result pages
- ▶ use mouse to click on a link that looks like Robinson's map
- ▶ download image and **trust** its authenticity

# How To Retrieve Robinson's Map 40 Years From Now?

- ▶ turn on the internet
- ▶ open a web browser
- ▶ search the internet for keywords
  - ▶ **and rely on a delicate and complex socio-technical network**
- ▶ inspect result pages
- ▶ use mouse to click on a link that looks like Robinson's map
- ▶ download image and **trust** its authenticity

**Likely will not work due to intricate network of dependencies.**

# How To Retrieve Robinson's 40 Years From Now?

**My (Crazy?) Proposal:** Sign the citation <sup>1</sup>

# How To Retrieve Robinson's Map 40 Years From Now?

... by searching the universe (in, and beyond, the internet) for the content with the unique fingerprint

hash://md5/9027bb8d372e4ffb9fabe74cab6a3434 .

... in addition to searching by keywords

# Zenodo Search, Take 2.

The screenshot shows the Zenodo search interface. At the top is a blue header with the Zenodo logo, a search bar containing the hash `*hash://md5/9027bb8d372e4ff`, and navigation links for 'Communities' and 'My dashboard'. A user profile dropdown for 'jhpoeien...' is on the right. Below the header, the search results show '2 result(s) found'. On the left sidebar, there are filters for 'Versions' (with a 'View all versions' toggle), 'Access status' (with an 'Open' checkbox), 'Resource types' (with 'Dataset' and 'Image' checkboxes), and 'Subjects'. The main content area displays two results. The first result is 'Arán Map (Print Version) P120/3/1/1' with hash `hash://md5/9027bb8d372e4ff9fabe74cab6a3434` by Robinson, Tim. It is labeled as an 'Image' and has a green 'Open' button. The description states it is a map of the Aran Islands produced by Tim Robinson, drawn at a scale of 2.2 inches to the mile, including information on townlands, places of interest, and accommodation. It was uploaded on March 3, 2025. The second result is 'Arán Map P120/3/1/1' with hash `hash://md5/19681c723aee31c4ad24d4ae5f805ad8` by Robinson, Tim. It is labeled as a 'Dataset' and has a green 'Open' button. The description is similar but mentions 'sub-division of the townlands'. It was also uploaded on March 3, 2025. Both results show 1 download and 1 user icon.

# Guiding Questions

- ▶ How do *you* cite data?
- ▶ How do you look up cited data *now*?
- ▶ How do you look up cited data *40 years from now*?

Extra

# Internet Is Designed For *Exchanging* Information

*The internet is a powerful tool for exchanging digital information. But the Internet's contents changes constantly: websites are launched and taken down, webpages change, and content gets archived or lost.<sup>2</sup>*

---

<sup>2</sup>Jorrit Poelen. 2024. Unleashing Digital Knowledge Into The Future.

Accessed on 2024-02-06 at <https://linker.bio>

line:hash://sha256/8ac18eb75ff20d40d1d60bb6ad5a745eb528093d1ffbe373e3847c131460

## Internet Is *Location-based*

*By design, a web address, or Uniform Resource Locator (URL), points to a specific internet location from which a resource, like a webpage, can be retrieved. However, a URL does not provide a way to verify that a retrieved webpage was the one we asked for.* <sup>3</sup>

---

<sup>3</sup>Jorrit Poelen. 2024. Unleashing Digital Knowledge Into The Future.

Accessed on 2024-02-06 at <https://linker.bio>

line:hash://sha256/8ac18eb75ff20d40d1d60bb6ad5a745eb528093d1ffbe373e3847c131460

## Finding Content By Their Location Is ... Tricky

*Imagine using a URL-like reference to find a book at a library: instead of locating a book by what it is (e.g., title, author), you refer to a book by its location (e.g., third shelf on the second row next to the window). With this, a book becomes unfindable if moved to another shelf. And, if you do manage to find a book at the referenced location, how would you know you've found the book you are looking for? <sup>4</sup>*

# Finding Content By Their (Summarized) Content Is ... What Librarians Do

*Instead of pointing to where books are located, librarians point to them using a bibliographic reference. For practical reasons, only a few identifying clues are included in such a reference (e.g., author, year of publication, title, and publisher). **So, librarians refer to content by what it is, and knowing where it may be located is secondary.***<sup>5</sup>
